# Family Plans

Protecting what matters most to you.

## Family Plan Key Features

### Secondary Member

Your primary member can invite a family member to create their own account and access identity theft protection benefits.

### Add Dependents

Add up to three dependents for family identity theft protection insurance.\*

### Stay Notified

Receive real-time alerts for possible fraud and other suspicious activity.

## How It Works

### 1. Invite the Secondary Member

The primary member can invite secondary members during enrollment or later in the family plan tab of their account.

### 2. Secondary Member Receives Email to Enroll

The secondary member gets an enrollment email with a link. They can click to access the enrollment page and sign up without entering payment info, handled by the primary member.

### 3. Sign Up and Enjoy!

Once enrolled, secondary members access their benefits and dashboard. They can't invite another secondary member or change their plan level.
